Education

Vanderbilt University PhD in Computer Science GPA: 3.94/4.0. Advised by Dr. Ipek Oguz.	Jan. 2025 – Present
California Baptist University B.S. in Computer Science, <i>summa cum laude</i> GPA: 4.0/4.0. Ranked #1 in graduating class.	Aug. 2019 – Apr. 2023

Experience

Vanderbilt Medical Image Computing Lab (MedICL) <i>Graduate Student Researcher</i> • Developing deep learning methods for image restoration and generation • Designing registration and volumetric inpainting models for high-resolution 3D OCT data, addressing motion-induced slice corruption • Exploring how learned representations can maintain robustness across diverse imaging tasks	Jan. 2025 – Present
GE Vernova <i>Software Engineer</i> • Led the wildfire forecasting initiative, including the end-to-end training, visualization, and productization of ML pipelines with power grid applications • Presented results of wildfire risk forecasting analytic to the C-Suite, helping to secure significant funding for further integration • Honored as a 2024 GE Vernova Changemaker for co-leading a company-wide initiative to integrate GenAI into GEV Electrification Software products	Dec. 2023 – Jan. 2025
CalBaptist ML & NLP Lab <i>Lead Undergraduate Researcher</i> • Built representation models to find empirical patterns in unstructured online data • Proposed a novel data preprocessing approach that introduces noise and helps medical imaging models better perceive their environments, increasing accessibility for low-income communities • Produced analyses and applications for three papers, leading the team from inception to execution	Jan. 2022 – Dec. 2023
General Electric <i>Software Engineering Intern</i> • Led a database optimization initiative that saves thousands of dollars per year • Developed and optimized microservices for large-scale data ingestion applications	Jun. 2022 – Aug. 2023
Keysight Technologies <i>Software Engineering Intern</i> • Created a web platform and built applications to enable clients to customize their products • Performed data analysis to help eliminate 40% of product-option configurations	Jun. 2021 – Aug. 2021
